# Issues/Bugs addressed for WebExtension Persona Switcher

| Issue | Title | Addressed? | Notes: |
|-------|-------|-----------|--------|
| # 2 | Sort Personas Alphabetically | Yes | |
| # 3 | Move "Default" to bottom of list | Yes | |
| # 4 | Right click on PS icon immediately open PS Settings | Yes | Implemented via the context menu |
| # 5 | Compatibility with Persona Menu extension | Yes | Documenting how it interacts with Persona Switcher and what works and what doesn't. |
| # 6 | Middle click to set default persona | No | Can't capture mouse clicks on the browser action button. |
| # 7 | Jump to name via keyboard | Yes/No | The menus still use the menupopup element, but the browser action does not. |
| # 8 | Use page up and down to scroll through long list | No | Not possible. We can't intercept key events on the menus. |
| # 9 | Mark active theme in list | Yes | |
| # 10 | Create categories of personas | No | Implementation would involve a lot of complex/ugly code. |
| # 11 | The button does not take the proper appearance in the current Firefox | No | We believe the button appearance was fixed before we got the code. |
| # 12 | Two defaults | No | This is no longer occurring |
| # 13 | Shortcut key | No | No longer needed because a new tools menu shortcut was added as a preference |
| # 14 | Changing MS delay | Yes | |
| # 15 | Changing preview doesn't affect current windows | Yes | |

| # 16 | Create list only on startup | Yes | |
